

Alcina Laboratory. Updated list of Services and Prices for 2017. Sector : Urban Arboriculture

All our analyses are based on molecular biology technics.
We apply a fixed fee of 9 € (before VAT) per order (regardless the number of samples).

ALCINA'S INNOVATION	<h3 style="text-align: center; margin: 0;">Experiment and Research support</h3> <p style="text-align: center; margin: 10px 0;">Our team of scientists provide you with support towards elaborating and monitoring experimental protocols as well as creating new analyses designed on your needs.</p> <p style="text-align: center; margin: 0;">For more information, do not hesitate to contacting us</p>
--------------------------------	--

Analyses of mycelium and fructification

Analysis code	Analysis description	Sample prices (before VAT)	
		Up to 3 samples	From 4 to 9 samples
URB_PURE	Identification of all species of fungi	91,00 €	81,00 €

Identification of xylophageous fungi in wood samples

The sample (piece of wood or sawdust) is analyzed by a specific PCR followed by a DNA sequencing.

Analysis code	Analysis description	Sample prices (before VAT)	
		Up to 3 samples	From 4 to 9 samples
URB_EPI	Identification of stem decay fungus species. <i>We commit ourselves to indicate the presence or absence of these wood decay fungi :</i> Species of Hymenochaetaceae family (Phellinus, Inonotus, Fomitiporia...), Genus Hericium, Stereum, Trametes, Schizophyllum commune.	147,00 €	128,50 €
URB_HYPO	Identification of root decay fungus species. <i>We commit ourselves to indicate the presence or absence of these wood decay fungi :</i> Armillaria mellea, A. ostoyae, A. cepistipes, A. gallica, A. tabescens Ganoderma adspersum, G. resinaceum, G. lucidum, G. applanatum Species of Hymenochaetaceae family (Phellinus, Inonotus, Fomitiporia...) Gymnopus fusipes, Kretzschmaria deusta, Perenniporia fraxinea, Heterobasidion annosum, H. parviporum, Phaeolus schweinitzii, Laetiporus sulfureus, Meripilus giganteus	147,00 €	128,50 €

Identification of pathogenic fungi

Analysis code	Analysis description	Sample prices (before VAT)	
		Up to 3 samples	From 4 to 9 samples
URB_CERA	Specific diagnosis of Canker stain of plane (<i>Ceratocystis platani</i>) on sample wood (wood chips, sapwood, core of wood) Ceratocystis platani diagnosis are carried out in a level 2 containment laboratory granted by a Prefectoral autorisation.	96,00 €	86,00 €
URB_CHAL	Specific diagnosis of Ash Dieback (<i>Chalaria fraxinea</i>) on leaf, shoot, wood, cankers...	126,50 €	111,00 €
URB_MASS	Specific diagnosis of Massaria (<i>Splanchnonema platani</i>) on sample wood (wood chips, sapwood, core of wood)	126,50 €	111,00 €
URB_VERT-B	Specific diagnosis of Verticillium (<i>Verticillium dahliae</i>) on sample wood (wood chips, sapwood, core of wood)	126,50 €	111,00 €
URB_VERT-S	Specific diagnosis of Verticillium (<i>Verticillium dahliae</i>) in soil. <i>This diagnosis aim is to detect this fungus in soil before plantation of susceptible plants.</i>	192,00 €	167,00 €

Analysis report

Each analysis is provided which specifies the results and the methodology.
The results are issued within 5 to 15 working days from the sample reception day.

Urgent analysis

For all urgent requests, the results will be issued in under 5 days from the sample reception day.
Price is increased by 25%.

Storing and mailing samples

- Place the sample in a hermetically sealed plastic bag. Only one sample per bag.
- Label accurately each sample.
- Store the samples at 5°C until the mailing.
- Complete the information document specifying the required analysis for each sample and the email address to which the results must be sent.
- Choose a quick delivery (DHL, UPS ...) and avoid deliveries on week-end and send to :

Alcina
« Samples – laboratory »
10 rue des Amaryllis
34070 Montpellier
France

For wood samples, a collection kit is send upon request to contact@alcina.fr
